

SECURITY AGAINST FORGERY  
AND COUNTERFEITING

# DOCUMENT SECURITY

Security against forgery and counterfeiting is critical to protecting documents. The UCC states that check users must take the appropriate steps to protect themselves against fraud.

Layering a minimum of three security features is recommended.

Document security is vital for checks, coupons, tickets, prescriptions, and other higher-value documents.

Prevention is crucial and provides maximum protection.

## MARKETS

- Manufacturing
- Distribution
- Insurance
- Healthcare
- Retail
- Financial
- Education

## APPLICATIONS

- Checks
- Tickets
- Certificates
- Parking permits
- College transcripts

## FEATURES

- Void pantographs
- Watermark
- Visible and invisible fibers
- Chemical reactants
- Microprinting
- Bleed thru MICR numbering
- Thermochromic ink

## BENEFITS

- 100% guaranteed match from form to label
- Competitive pricing
- In-line application of labels
