

ACCOUNTABILITY AND DOCUMENTATION  
OF CUSTODY AND CONTROL PROCEDURES

# CHAIN OF CUSTODY/ DRUG TESTING FORM

The chain of custody process traces accountability from the specimen donor to each person who had possession of the sample. Following the proper protocol by documenting the custody and control ensures integrity during collection, transfer, analysis, reporting of results, and sample storage or disposal.

Multi-part forms, continuous or unit set, incorporate various security features, including tamper evident and bar code labels. Numbering is camera-verified for accuracy.

Chain of custody accurate documentation from the point of collection to storage or disposal, follow federally mandated control procedures should any lab results be challenged.

## MARKETS

- Healthcare
- Government
- Forestry
- Animal control
- Water treatment plants
- Drug testing facilities

## APPLICATIONS

- Drug testing
- DNA testing
- Seed plantation testing
- Water treatment testing

## FEATURES

- Multi-part forms; continuous and unit set
- Bar code and human read numbers
- Add-A-Label® or integrated adhesive labels for cap of specimen container
- Offset printed up to 8 colors including 4cp
- Multiple stock label options including tamper evident and latex
- Unique numbering available

## BENEFITS

- 100% guaranteed match from form to label
- Competitive pricing
- In-line application of labels
